Custom Venting Forecast

Company: Plan B Tech (Duz Cho LP)

Burn Registration Number(s): on file

Issued: March 24, 2020

FOR BURNING ON: March 25, 2020

Synopsis:

Wednesday: Upper trough moves eastward, but airmass is still unstable in the northwest flow behind it. With moderate winds venting will be good.

Thursday: Surface low in northwestern BC giving an unstable airmass. With light to moderate winds venting will be good.

Friday: Surface low maintaining an unstable airmass, but warmer air aloft capping mixing heights at higher elevations. With light winds venting will be fair to good.
