Second comment period begins May 9 for EAC amendment to haul material

Dear neighbour,

The Environmental Assessment Office is beginning a second public comment period from May 9 to May 30, 2022 for BC Hydro's request to amend its Environmental Assessment Certificate for the Site C project. The first comment period took place from April 29 to May 28, 2021.

The application to the B.C. Environmental Assessment Office focuses on using public roads to haul material from 85th Avenue Industrial Lands to the dam site on a contingency basis.

Hauling would only take place when the conveyor is not operating due to events beyond BC Hydro's control. This could include vandalism/sabotage, extreme and prolonged inclement weather, equipment repair delay/disruption, expertise disruption, localized fires, vehicle, equipment or human accident, and *force majeure* or "Act of God" events.

The public is invited to submit comments regarding *new* or *additional* adverse impacts that might result from the proposed amendment.

Review the complete application for amendment
