Subject: BC Hydro – Site C – Old Fort update – April 2023
Date: 2023, April 25 2:23:22 PM

Hello Old Fort neighbours,

We want to take the opportunity to update you on a few items related to the Site C project.

Dust suppression

As we head into spring, work has resumed on the earthfill dam. The earthfill dam is nearly 90 per cent complete and we are still on target to complete it this summer.

With earthmoving works having resumed, contractors have started watering roads at the construction site to reduce dust. Watering will continue throughout the summer. In addition, we will undertake the annual application of calcium chloride on site roads as soon as the conditions are appropriate to help reduce the spread of dust.

House washing

Some residents are asking about exterior house washing this spring. As you'll recall, about 15 residents took us up on our offer last fall to have the exterior of their homes washed. We will again be offering to cover the cost of exterior house washing later in the spring when overnight air temperatures remain above freezing. We will be providing more details to you about this process in the weeks ahead.

Public information sessions

We want to ensure residents of Old Fort are aware of the upcoming information sessions we're hosting on Site C reservoir filling in May for Peace region residents. At the sessions, visitors will have the opportunity to review information boards on a number of reservoir filling topics and speak to members of the Site C project team.

The dates of these sessions are as follows:

Fort St. John (drop-in)

Tuesday, May 2

Pomeroy Hotel & Conference Centre

11308 Alaska Avenue, Fort St John

5:30 p.m. to 8:00 p.m.

Hudson's Hope (drop-in)

Wednesday, May 3

Hudson's Hope Community Hall

10310 Kyllö Street, Hudson's Hope

6:00 p.m. to 8:00 p.m.

Virtual presentation

Tuesday, May 9

MS TEAMS (RSVP for meeting link)

7:00 p.m. to 8:30 p.m.

If you're interested in attending one of these sessions, please RSVP to: sitec@bchydro.com

More information about reservoir filling, including a video, can be found [on this page](#).

Regards,

Site C Project team
