Subject: BC Hydro Site C P6 island work
Date: 2023, June 06 4:32:59 PM

Dear Old Fort neighbours,

Over this past weekend, we completed two days of reclamation work on the P6 island in front of Old Fort. This work involved removing the temporary bridge abutment on the island side, removing rip-rap, recontouring work in that area and seeding. We had a one day project on Monday on the north bank to remove the approximately 200 metre long fording trail just across from P6 island. Work to remove the temporary P6 island bridge abutment on the north bank will be completed later this summer.

Regards,
Site C Project team
