

Map Notes: 1. Datum/Projection: NAD83/UTM Zone 10N. 2. Orthophotos created from 15,000 photos taken Aug 26th, 2011; 1:40,000 scale photography taken Sept 2007; 1:15,000 scale photography taken Aug 2011; TRIM; DataBC Imagery WMS; City of Ford St. John 2012. 3. Proposed maximum normal reservoir level (full supply level-461.8m) from Digital Elevation Models (DEM) generated from LiDAR data acquired July/August, 2006. The surface area of the reservoir will change over time after reservoir filling as a result of shoreline erosion and deposition of sediment. 4. Additional access roads to the dam site on both the north and south sides of the river are being evaluated. 5.85° Avenue Industrial Lands would be a source of construction material for the proposed dam, and would be a multi-use site that would include storage nd lavdown

b. Drawing Number: 1016-C14-B4637. Rev. 5. Map Created: July, 2014.

Highway 29 Highway Realignment Proposed Hudson's Hope

2.5km

Shoreline Protection Proposed B.C. Hydro Operated Boat Launch and Day Use Recreation Area

Proposed Reservoir

Construction Power from Fort St. John Substation

## Proposed New Transmission Corridor. 2 New 138 kV Lines. Voltage 500 kV

Proposed New Transmission Corridor. 2 New 500 kV Lines.

Construction of the Site C Clean Energy Project is subject to required regulatory approvals including environmental certification. The construction activities illustrated on this map are based on project planning at the time of preparation of the Environmental Impact Statement and may change as a result of procurement and project planning advance
