Dear Alexandra Gray:

Re: Water Sustainability Regulation – Part 3, Section 39 Authorized Change – No. 9000183

Thank you for submitting your Water Sustainability Regulation Authorized Changes Application to FrontCounter British Columbia on February 20, 2017.

The Water Sustainability Regulation, Part 3, Section 39 (1)(a) Authorized Change was reviewed for the proposed removal, maintenance and installation of one road crossing culvert for the unnamed stream located on or about the Boucher 0+462 location description in support of the BC Hydro and Power Authority (BC Hydro) Site C Clean Energy Project.

All works in and about a stream must be compliant with applicable federal, provincial, and municipal legislation, regulations, and associated policies; including, but not limited to, the [Water Sustainability Act](#), the [Water Sustainability Regulation](#), and the [Northeast Region Terms and Conditions](#) document. The project must adhere to the “1_Desc_Activities_Works_BoucherPrivate,” and “20170209 4EG Site C Access roads EPP rev5” documents submitted by the proponent in support of the project.

BC Hydro will ensure an appropriately qualified Independent Environmental Monitor is engaged to provide oversight and audit reporting services to the Ministry as required, and that an appropriately qualified Environmental Monitor is engaged to oversee the implementation of the project.

If you have any questions or concerns regarding this communication you can contact me at (250) 387-4197.

Melvin “Jameson” Mailloux, PAg
WSA Officer and Habitat Officer

Hi Mike

Pursuant to my Water Sustainability Regulation Section 36(1) Habitat Officer designation:

Please accept this communication as an extension to the timing window associated with Authorization No. 9000228 to August 31st, 2017.

Sincerely
Jameson

Subject: Variance to Water Sustainability Regulation Approval (File# 9000228)

Hi Mike

Thanks for the information regarding the works for the permanent clear span bridge and the temporary bridge. NE Ecosystems encourages the use of bridges for stream crossings rather than closed bottomed culverts. As the information that I have received indicates that the clear span bridge meets the requirements for a Notification under Section 39 of the Water Sustainability Regulation, please move forward with the works as outlined in the EMP.

Pursuant to my Water Sustainability Regulation Section 36(1) Habitat Officer designation:

Please accept this communication as an extension to the timing window associated with Authorization No. 9000228 to September 30th, 2017.

Regards,

Kyle
