

This fact sheet provides information about the procurement process and scope for the site preparation – north bank contract for the Site C project.

SITE PREPARATION – NORTH BANK

The contract was awarded to Morgan Construction & Environmental Ltd. in July 2015.

The scope of work included the following:

- Construction of approximately seven kilometres of access roads on the north bank of the Site C dam site;
- Excavation of about two million cubic metres of material;
- Producing and stockpiling approximately 100,000 cubic metres of aggregate material for use by other contractors at the dam site; and
- Clearing and grubbing of approximately 55 hectares.

Site preparation activities were required to prepare the dam site for the start of main civil works.

CONTRACT SCHEDULE

Site preparation work began in August 2015 and concluded in November 2016.

Excavation of material; part of the north bank at the Site C dam site
